Page 15, line 6 INSERT:

“We agree with Staff that a compromise is appropriate to permit very large and medium size projects to each have opportunities to compete for PBI funding throughout the year. We modify Staff’s proposal slightly and believe that the four funding cycles should alternate between a 2MW cap to a 750kW cap to a 2MW cap to a 750kW cap in that order throughout the year. This preserves the ability of medium sized projects to compete throughout the year while allowing very large projects an opportunity early in the year as well as late in the year.”

“with system size caps alternating between 2MW and 750kW”
